**Subject:** Re: 2009-119-C Complaint Rebuttal Testimony

Dear Mr. Terreni & Ms. Judy Mathews,  
I am writting you this letter as I said I would within 7 days from the previuos telephone conversation with Mr. Terreni and Senator Jake Knotts.  
As discussed the previous 25 hard copys requested of the direct testimony has been waived.  
This matter is in reference to case # 2009-119-C I still request a hearing A.S.A.P. to address my complaint against the P.B.T. Communications, Inc Gilbert, S.C.  
Both Senator Knotts & myself and famlily strongly beleive that my Constitutionaly Right were violated when contractors representing P.B.T. trespassed on my property, without being invited and dug up my driveway for several hundreed feet. This irresonable action severely damaged my driveway, pumped septic system and fresh water supply.  
I contacted P.B.T. several years ago and stated to them that I replaced my telephone and internet services with another carrier and no longer need their services, and to please remove any of their equipment from my property. I also explained to them the reasons for my dismissal of their services, mainly too high of prices and poor service. So I consider myself to no longer be a active customer of P.B.T. which counters their argument of them having the right to come on to my property to upgrade my service.  
I also strongly beleive that the document that they claimed that I have signed titled Right-of-ingress and regress for installation, maintence and removal of telephone equipment dated Feb. 12, 1992 does not apply to their digging up and installing a fibre optic line down the entire length of my driveway. Their previous lines put in in 1992 were ran through the woods on my property line no where near my driveway and septic and water systems. At the time they had no provisions to carry internet service or television channels. They were not in my way and had no interference to my septic and water systems and driveway.

P.B.T. contractors returned to my property many times to fix the numerous problems that they have created with limited success. There are still problems with my fresh water system pump that cause the circuit breakers to trip intermittently. They have their fibre cable within inches of my very expensive Septic Tank holding and pump systems. This makes it impossible for any tank maintenance and digging. Their cable also crosses and very close to my Propane Line and Ham Radio tower and grounding systems. So in conclusion, I am requesting P.B.T. to remove their cable and return my property to the condition they found it in before they came to upgrade a service that is not needed by me or my family. Also when the work is done I request them to stay of my property and leave me and my family alone.

Their reckless actions have caused both me and my family much pain and suffering in many ways.

I am not a man of means, but as suggested by Senator Knotts, I will be consulting a Attorney to help represent me if it take every penny I have.

As the senator stated that this is the typical case of the Big Man rolling over the little man, and with out the professional help of a Attorney the odds are in their favor.

Thank you for taking time to review this matter.

Sincerely,

"The Little Man" Richard N. Hatalski

PS... My witnesses are my wife Phyllis Hatalski, My son, Rick Hatalski and my step son Duane Pettner
